

## Quality Report

Brand : **SkinIdent** Product : **Liposome Super**

Q	Ingredient	Description	Function	Source	Page
+++	AQUA	The human body exists for about 65% out of water and is of vital importance for the functions of the body and the skin.	solvent	INCI/EC	List
+++	GLYCEROL	Glycerin. Essential part of the hydrolipid layer of the skin. Highly hygroscopic: it absorbs water from the air. Therefore, unsaturated, it is dehydrating in higher concentrations (+30%). Diluted with water in a skin care product, however, it will soften the skin.	denaturant / humectants / solvent	SL	174
+++	UREA	Is an essential element of a healthy skin and the natural moisturizing factor (NMF or Natural Moisturizing Factor) of the skin.	antistatic agent / humectants	INCI/EC	List
+++	LECITHIN+D-ALPHA- TOCOPHERYL ACETATE+RETINYL PALMITAT	Lecithin+vitamin E and A. Lacithin is a complex combination of diglycerides of fatty acids linked to the choline ester of phosphoric acid. High concentration of essential fatty acids, similiar to those of the human skin. Vitamin E and A are essential vitamins for the human body and skin.	antistatic agent / emollient / emulsifying agent	Wörter+Ku	274+167
+++	CETEARYL OCTANOATE	Hexanoic acid, 2- ethyl- , C16-18- alkyl esters. A liquid wax present in the skin sebum with skin recovering and skin protecting qualities.	emollient	OEKO + SL	300 + 76
+++	D-PANTHENOL	Provitamin B 5. The provitamin D-Panthenol is transformed through enzymes into vitamin effective D-Pantothen acid. Occurs in all living cells. Works against inflammation and itching, curing, firming, moisturising, penetrates well into the skin and the hair shaft. Pro- vitamin B5 is recovery promoting and moisturizing. Vitamins are an essential element for a healthy human body and a healthy skin.	NS	SL	303
+++	PROLIN	As an amino acid this is the active element of the human collagen and at the same time the most occurring amino acid of the natural moisturizing factor (NMF or Natural Moisturizing Factor) of the skin. Because of it's small size it can, in contrast to collagen, penetrate into the skin. L-proline is the natural form, DL-proline the synthetical form.	antistatic agent	INCI/EC	List
+++	SODIUM LACTATE	Is a milky acid turned into a PH-value of 5,5 and because of this	buffering agent /	SL+OEKO	388+392

		an essential element of the natural moisturizing factor (NMF of Natural Moisturizing Factor) and the acid protecting layer of the skin.	humectants		
+++	CERAMIDE-3	Ceramids are an essential part of the human skin and the hydrolipid layer of the skin. Can restore damaged skin. Best possible fat for cosmetic products. Important elements of the intercellular substance in the horny layer and together with cholesterol, fat acids en lecithin (phospholipids) of essential interest for the good functioning of the barrier function of the skin.	NS	Kurs	138
+++	FYTOSFINGOSINE	An element of ceramids that occur in the human horny layer as independent bioactive substance. They stabilize, among others, the skin bacteria and with it the defense system of the skin.	emollient	Wörter	260
+++	HYALURONIC ACID	Important substance in the human connective tissue, can bind water, moisturising and preserving effect. Forms an invisible porous film that preserves the horny layer from drying out. It is an important natural element of the skin that has a moisturizing and astringent effect.	antistatic agent / humectants	SL	198
+++	ALLANTOIN	Occurs in many plants and the human skin. Has wound healing and soothing properties, accelerates the cell regeneration. Especially suited for the treatment of acne. Metabolism product of the human body. Has a stimulating effect on the forming of new cells as well as recovering stimulating qualities.	NS	Wörter	16
+++	SODIUM ASCORBYL PHOSPHATE	Is the storage form of vitamin C. It is bioconverted into natural vitamin C in the skin. Protects the skin against the harmful effects of the dangerous oxygen radicals. Vitamins are an essential element for a healthy human body and a healthy skin.	NS	Kurs	179
+++	D-MIXED-TOCOPHEROLS	Stands for a mix of natural tocopherols (vitamin E). Vitamin E is the most important skin-protecting vitamin, which protects the skin against UV-radiation and oxygen radicals. Vitamins are an essential element for a healthy human body and a healthy skin.	NS	Wörter	274/275
+++	BIOTIN	Vitamin H. Biotin is contained in all living cells in low quantities. A lack of biotin causes hair loss and	biological additive	Wörter	39

	dermatitis. Although originally described as vitamin H, it is today often assigned to the B-vitamins. As all vitamins a necessary element in the healthy human skin. In 1995 Gilli en Floersheim have proven a distinct reduction of a tendency towards wrinkles.			
<b>Total score of this product: 100/100</b>				
Total : 15 ingredients				
15 ingredients are perfect for the health of your skin (+++).				
0 ingredients are very beneficial to your skin (++) .				
0 ingredients are beneficial to your skin (+).				
0 ingredients are neutral and don't have any clear positive or negative effect on your skin.				
0 ingredients can damage the health of your skin and should be avoided (? or ???).
